NOTABLE PROJECTS

Empower SCS | (Pre-)Onboarding Solution

Lead Architect | International logistics company

Create a simple, immersive and personalized onboarding experience for new applicants and employees featuring multi-channel notifications and single-click sign-in.
Team of 8 developers and UX experts. Planned and implemented MVP. Enterprise grade architecture including Continuous Testing, Integration and Deployment, Infrastructure as Code, Platform Services, Low-Code extensions, integration testing and on-demand enviroments.

- Reduced no-show rate by 6%
- Reduced early dropouts (in first 14 days) by 29%
- C# backend, React + TypeScript frontend

Sociplan | Shift planning and HR calculation

Lead Architect | Gas Station Management

Supporting station managers and HR to plan shifts, automate contract addendum creation, e-signing and conflict detection as well as payment calculation.
Team of 5 developers and UX experts. High domain complexity due to national workers regulation. Cutting edge technology

- Check for 30+ contract and law violations
- Cut payment calculation from 14 days to single click
- FastAPI + Python backend, React + TypeScript frontend

LeA | AI based postprocessing

Lead Architect | Ministry of Justice

Proof of concept for a semi-automatic post-processing of documents. Named Entity Recognition for pseudonymization, Large Language Models for advanced tasks like summarization or reasoning.

- High complexity due to sensitive nature of the data
- Able to run in containerized environments for data ownership
- React + TypeScript frontend
